Classifier evidence hints

The document records goods received or delivered, with quantities and condition notes rather than a payable total.

Control	Synthetic value
Ground truth category	delivery_note
No real data statement	All names, addresses, IDs, amounts, and transactions are fictional.
Expected action	Classify from document text, not from filename.
Filename leakage check	The PDF filename intentionally does not reveal this category.

Audit note: this file was generated as part of an expanded DocWeave local test corpus. It is suitable for demonstrations of classification, review proposals, rename approval, and restore lineage. It is not a real business record.
